

## *Portrait Photography*

Your wishes are very important to us when it comes to Social Photography. It is the start of the process, which leads to an understanding relationship between subject and sitter, and this is the key to Successful Portraiture.

Take One Photography offers you the skills of a highly qualified photographer, together with portable lighting equipment and backgrounds to create a 'studio' in your home - for that professional touch.

Alternatively, we can create beautiful pictures of you and your family in whatever setting you desire, such as in your home, garden or other favourite location. It is our aim to create a charming natural portrait that will last - and be admired in your home for many years to come.
